Lifetimes

Lifetimes

An indication of how long an object will live

Lifetimes

An indication of how long an object will live

Rust prevents parts of objects outliving the object

Lifetimes

An indication of how long an object will live

Rust prevents parts of objects outliving the object

```
struct Object<’lifetime> {
  field: &’lifetime str
}
```

Lifetimes

An indication of how long an object will live

Rust prevents parts of objects outliving the object

```
struct Object<’lifetime> {
  field: &’lifetime str
}
```

Lifetime elision - compiler builds lifetimes for us when evident
